

Residential Option for Quick Quotes

Today a residential checkbox was added to the Quick Quotes feature allowing more accurate pricing without the need for a full quote.

The screenshot shows a web form titled "Quote Shipment". It has three main sections: "SHIPPER", "CONSIGNEE", and "PACKAGE". In the "SHIPPER" section, there is a dropdown menu for "COUNTRY" with "Canada" selected. Below this, there is a "Residential" checkbox which is circled in red. The "CONSIGNEE" section has a "COUNTRY" dropdown menu. The "PACKAGE" section has a "Customer Packaging" dropdown menu set to "Imported", a "CARTON" dropdown menu set to "CARTON", and input fields for "Length", "Width", and "Height". At the bottom, there are fields for "Total Weight" (0.000kg) and "Total Insurance" (\$0.00). A "GET QUOTES" button is located to the right of the "PACKAGE" section.

Residential Checkbox now present.
City/Postalcode/Residential only
appears after country selection

In addition after country selection the next field is automatically focused, starting with the consignee country. These adjustments make it possible to use nothing but the keyboard for a quote.
