

Shipment Notifications

We now have two additional e-mail notification options for shipments. These are per-shipment options that result in an e-mail being sent to the shipper and/or consignee at the time the shipment is submitted to the carrier.

The screenshot shows a form titled "SHIPMENT OPTIONS". It includes the following fields and options:

- Shipment Date: 2015-08-18
- Payment: My TotalShip Traffic Solutions Account
- Saturday Delivery
- Signature Required
- Customer References: 441080431
- Notify Shipper by Email
- Notify Consignee by Email

The checkboxes for "Notify Shipper by Email" and "Notify Consignee by Email" are highlighted with a red rectangular box.

There are two types of notification covered here: **Shipper** and **Consignee**. Both messages are templates can be customised at the associate level.

The **Shipper** notification is intended to provide instructions for the shipping and will include all documents that need to be included with the shipment.

the **Consignee** notification is intended to provide the receiver of the shipment a link so they can track the shipment progress. The consignee will also be shown their address so it can be verified.
