

# Select Invoices

A new feature introduced today is the ability to construct invoices with specific transactions on them and nothing else. Normally an invoice contains all appropriate (reconciled, approved) transactions that haven't been attached to a previous invoice.

Select Invoices are invoices that contain only Selected transactions. In Administration | Transactions you will be able to find transactions that can be selected. Note that selecting a transaction does not make it qualify for invoicing. This is simply a method to eliminate unwanted transactions from an invoice.

Begin by finding the transactions you wish to invoice. You can search by shipment number and tracking number. Check the transactions you want and click Select to mark them. A tick will appear beside the transaction number. The Unselect button reverses this.

## Transactions

The screenshot shows the Transactions interface. At the top, there is a search bar with the value "44011859". Below the search bar is a table with the following columns: Number, Date, Invoice, Customer, Transaction Type, Category, Shipment, Courier, Courier Account, Description, and Gross Amount. The table contains two rows. The first row has a checkbox that is not checked. The second row has a checkbox that is checked, and the transaction number "66014074" is circled in red. Below the table, there is a "Showing 1 to 2 of 2 entries" message and a "Show 25 entries" dropdown. At the bottom, there is a row of buttons: View, Enter Manual Transaction, Download Transactions, Select (circled in red), and Unselect. An "Export" button is also visible on the right side.

### Excluding Selected Transactions

If you want to simply remove a transaction from an invoice you can follow these steps:

1. File a Select Invoice containing only the unwanted transactions
2. File the non-Select invoice (which won't have the previously invoiced transactions)
3. Cancel the Select Invoice releasing the unwanted transactions for a future invoice
